

# PRIVATE MORTGAGE INSURANCE: Promoting Homeownership for Arizona Families

Private mortgage insurance (MI) is typically required by mortgage lenders to approve homebuyers with down payments that are less than 20% of the purchase price. For 66 years, private MI has been an important component in the U.S. housing finance system, helping borrowers in Arizona and across the country to access home financing while protecting lenders and taxpayers.

By design, private MI is a proven, reliable method of shielding the government-sponsored enterprises (GSEs), Fannie Mae and Freddie Mac, as well as American taxpayers from losses on mortgage credit risk. Private MI companies have paid nearly **\$60 billion**<sup>1</sup> in claims since the 2008 financial crisis and housing market downturn, absorbing losses that the government and taxpayers would have otherwise incurred.

## Down Payment is One of the Biggest Hurdles to Homeownership

A 20% down payment is out of reach for many families and could sideline them from homeownership for years. According to the National Association of REALTORS®, the average down payment for first-time homebuyers is 6-7%. For example, it could take 35 years<sup>2</sup> for a household earning the national median income of \$70,784<sup>3</sup> to save 20%, plus closing costs, for a \$392,800<sup>4</sup> home (national median sales price).

In Arizona, the median income is \$70,821<sup>5</sup> and the median sales prices for a single-family home is \$452,500.<sup>6</sup> Using this same analysis, it would take 41 years<sup>7</sup> for a state resident to save 20%, plus closing costs (3% of the total sales price on average).<sup>8</sup>

## PRIVATE MI HELPS BORROWERS AFFORD A HOME SOONER

Private MI not only helps borrowers overcome the biggest hurdle to homeownership but acts as a second set of eyes with independent credit underwriting standards. It aligns the interests of borrowers, lenders, and investors.

# 38+ MILLION

## Private MI Helps Borrowers Bridge the Down Payment Gap

By helping borrowers qualify for a mortgage with a down payment as low as 3%, private MI has given more than 38 million families nationally the opportunity to purchase a home sooner for 66 years.<sup>20</sup>

### Private MI Protects Taxpayers

Private MI is a first level of credit protection against the risk of loss on a mortgage in the event a borrower is not able to repay the loan and there is not sufficient equity in the home to cover the amount owed. With the GSEs in conservatorship and the government effectively guaranteeing the GSEs, taxpayers face direct exposure to mortgage credit losses experienced by the GSEs. Traditionally, for loans with down payments under 20% of the purchase price, private MI – not taxpayers – covers the first losses if there is a default, up to certain coverage limits.

## \$60+ Billion

Amount private MI industry has paid in claims since 2008<sup>21</sup>

## 48%

Percentage of new loans with insurance protected by private MI in 2022<sup>22</sup>

## \$1.5 Trillion

Amount in mortgages currently outstanding with private MI protection<sup>23</sup>

### Private MI is Temporary

Unlike FHA and other government mortgage insurance, which typically cannot be cancelled, private MI paid by the borrower can be cancelled, leading to potential savings over the life of the loan. Private MI can be removed in two ways:<sup>24</sup>

**1** A borrower may request cancellation of private MI when 20% equity in the home is established. Cancellation may be subject to certain conditions, such as seasoning requirements and proof of the property's value.

**2** When the principal balance of the mortgage is scheduled to reach 78% of the home's original value and the borrower is current on payments, servicers are required to terminate private MI.

### Tax Treatment of MI

From 2007 to 2021, millions of homeowners claimed the federal tax deduction for borrower-paid MI premiums for private MI and government insurance and guarantee programs, allowing them to save more of their hard-earned dollars. While the deduction ended in 2021, Congress is considering legislation to make it permanent. USMI has consistently led a coalition of housing organizations for restoring the MI tax deduction, making it permanent, and expanding its eligibility. Data through tax year 2020 shows:<sup>25</sup>

## \$61.6 Billion

Total MI deductions claimed by homeowners

## 43.2 Million

Number of times the MI deduction has been claimed

## 3.3 Million

Average annual number of homeowners who claim the MI deduction

## \$1,427

Average annual MI deduction amount per qualified taxpayer
