

### **PRIVATE MORTGAGE INSURANCE:** Promoting Homeownership for Indiana Families

Mortgage insurance (MI) is typically required by mortgage lenders to approve homebuyers who have down payments less than 20% of the purchase price. For 68 years, private MI has been an important component in the U.S. housing finance system, helping borrowers in Alabama and across the country to access home financing while protecting lenders and taxpayers.

By design, private MI is a proven, reliable method for shielding the government-sponsored enterprises (GSEs), Fannie Mae and Freddie Mac, as well as American taxpayers, from losses on mortgage credit risk. Private MI companies paid nearly \$60 billion<sup>1</sup> in claims since the 2008 financial crisis and housing market downturn, absorbing losses that the government and taxpayers would have otherwise incurred.

#### Down Payment is One of the Biggest Hurdles to Homeownership

A 20% down payment is out of reach for many families and could sideline them from homeownership for years. For example, it could take 27<sup>2</sup> years for a household earning the national median income of \$74,580<sup>3</sup> to save 20%, plus closing costs, for a \$394,100<sup>4</sup> home (national median sales price).

In Indiana, the median income is \$70,030<sup>5</sup> and the median sales prices for a single-family home is \$248,700.<sup>6</sup> Using this same analysis, it would take 18<sup>7</sup> years for a state resident to save 20%, plus closing costs (3% of the total sales price on average).<sup>8</sup>

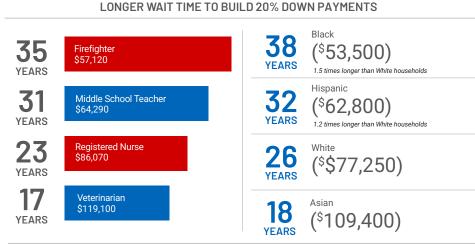

#### PRIVATE MI HELPS BORROWERS AFFORD A HOME SOONER

Private MI not only helps borrowers overcome the biggest hurdle to homeownership but acts as a second set of eyes with independent credit underwriting standards. It aligns the interests of borrowers, lenders, and investors.

# 39 MILLION

#### Private MI Helps Borrowers Bridge the Down Payment Gap

By helping borrowers qualify for a mortgage with a down payment as low as 3%, private MI has given nearly 39 million families nationally the opportunity to purchase a home sooner for 67 years.<sup>20</sup>

#### **Private MI Protects Taxpayers**

Private MI is a first level of credit protection against the risk of loss on a mortgage in the event a borrower is not able to repay the loan and there is not sufficient equity in the home to cover the amount owed. With the GSEs in conservatorship and the government effectively guaranteeing the GSEs, taxpayers face direct exposure to mortgage credit losses experienced by the GSEs. Traditionally, for loans with down payments under 20% of the home value, private MI – not taxpayers – covers the first losses if there is a default, up to certain coverage limits.

Insured market originations that private MI protected in 2023<sup>22</sup>

## <sup>\$</sup>1.6 Trillion

Amount in mortgages currently outstanding with private MI protection<sup>23</sup>

#### **Private MI is Temporary**

Unlike FHA and other government mortgage insurance, which typically cannot be cancelled, private MI paid for by the borrower monthly can be cancelled, leading to potential savings over the life of their loan. Private MI can be cancelled in two ways:<sup>24</sup>

A borrower may request cancellation of private MI when he/she has established 20% equity in the home. Cancellation is subject to certain conditions, such as seasoning requirements and proof of the property's value When the principal balance of the mortgage is scheduled to reach 78% of the home's original value and the borrower is current on payments, the servicer terminates private MI.

#### **Tax Treatment of MI**

For tax years 2007-2021, millions of homeowners claimed the federal tax deduction for borrower-paid MI premiums, allowing them to save more of their hard-earned dollars. USMI has consistently led a coalition of housing organizations to advocate for making the MI tax deduction permanent and expanding its eligibility. Data through tax year 2021 shows:<sup>25</sup>
