

PRIVATE MORTGAGE INSURANCE:

Promoting Homeownership for Illinois Families

Mortgage insurance (MI) is typically required to approve homebuyers who have down payments less than 20% of the purchase price. For 68 years, private MI has been an important and durable component in the U.S. housing finance system, helping borrowers in Illinois and across the country to access home financing while protecting lenders and taxpayers.

By design, private MI is a proven, reliable method for shielding lenders, investors, the government-sponsored enterprises (GSEs), Fannie Mae and Freddie Mac, as well as American taxpayers, from losses on mortgage credit risk. Private MI companies have paid nearly **\$60 billion**¹ in claims since the 2008 financial crisis and housing market downturn, absorbing losses that the government and taxpayers would have otherwise incurred.

Down Payment is One of the Biggest Hurdles to Homeownership

A 20% down payment is out of reach for many families and could sideline them from homeownership for years. For example, it could take 26 years² for a household earning the national median household income of \$80,610³ to save 20%, plus closing costs, for a \$412,500⁴ home (national median sales price).

In Illinois, the median household income is \$87,820⁵ and the median sales prices for a single-family home is \$292,350.⁶ Using this same analysis, it would take 17 years⁷ for a state resident to save 20%, plus closing costs (3% of the total sales price on average).⁸

PRIVATE MI HELPS BORROWERS AFFORD A HOME SOONER

Private MI not only helps borrowers overcome the biggest hurdle to homeownership but acts as a second set of eyes with independent credit underwriting standards. It aligns the interests of borrowers, lenders, and investors.

40 MILLION

Private MI Helps Borrowers Bridge the Down Payment Gap

By helping borrowers qualify for a mortgage with a down payment as low as 3%, private MI has given nearly 40 million families nationally the opportunity to purchase a home sooner for 68 years.²⁰

Private MI Protects Taxpayers

Private MI is a first level of credit protection against the risk of loss on a mortgage in the event a borrower is not able to repay the loan and there is not sufficient equity in the home to cover the amount owed. With the GSEs in conservatorship and the government effectively guaranteeing the GSEs, taxpayers face direct exposure to mortgage credit losses experienced by the GSEs. Traditionally, for loans with down payments under 20% of the home value, private MI — not taxpayers — covers the first losses if there is a default, up to certain coverage limits.

\$60 Billion

Amount the private MI industry covered in claims for losses since the 2008 financial crisis²¹

\$1.6 Trillion

Amount in mortgages outstanding with private MI protection, including more than \$1.4 trillion of mortgages backed by the GSEs, at the end of 2024²³

41%

Portion of newly insured mortgages that private MI protected in 2024²²

Private MI is Temporary

Unlike FHA and other government mortgage insurance, which typically cannot be cancelled, private MI paid for by the borrower monthly can be cancelled, leading to potential savings over the life of their loan. Private MI can be cancelled in two ways:²⁴

1 A borrower may request cancellation of private MI when they have established 20% equity in the home. Cancellation is subject to certain conditions, such as seasoning requirements and proof of the property's value.

2 When the principal balance of the mortgage is scheduled to reach 78% of the home's original value and the borrower is current on payments, the servicer is required to terminate private MI.

Tax Treatment of MI

President Trump recently signed the One Big Beautiful Bill Act into law, reinstating and making permanent the mortgage insurance premium tax deduction. This deduction, which was previously claimed more than 44 million times between 2007 and 2021, will help make homeownership more affordable without increasing risk in the housing finance system. Data through tax year 2021 shows:²⁵

Illinois (2021)	\$92.3 Million Total MI deductions claimed by homeowners in 2021	55,600 Number of households that claimed the deduction in 2021	\$1,661 Average MI deduction amount in 2021	3.4 Million National average annual number of homeowners who claimed the MI deduction for 2007-2021
National (2007-2021)	\$64.7 Billion Total MI deductions claimed by homeowners for 2007-2021	44.5 Million Number of times the MI deduction was claimed for 2007-2021	\$1,454 Average MI deduction amount for 2007-2021
